Why Earth Day

Infinite Complex / Infinite Water Inc. believes that the preservation and conscious understanding of the health of all living species, especially human, depends on this planet to provide resources for our species to continue. **Infinite Complex / Infinite Water Inc.** believes that acknowledging a day set aside as “Earh Day” is especially necessary to remind each of us that we cannot survive without a healthy planet.

Infinite Complex / Infinite Water Inc. in their daily course of business activity is constantly aware of the challenges that are brought on by waste and pollution. These are situations that are caused by the lack of education or an apathetic view, of people, towards bearing the responsibility personally. The growth of companies under the **Infinite Complex** conglomerate focus on technology to take on the void left by those that do not show enough respect to our planet.

Infinite Complex / Infinite Water Inc. will continually strive to direct companies and to produce new IP to increase the sustainability of our natural resources. **Infinite Complex / Infinite Water Inc.** encourages individuals to give thought to our planets health by reminding everyone to pay as much attention to **Earth Day** as they would for all the holidays that are routinely celebrated.

Infinite Complex / Infinite Water Inc. has a few suggestions that have become popular and easy for people to help on Earth Day and every day. Follow the “**R’s**”- **recycle, reuse, repurpose, reduce, refuse, rethink and repair.**

Infinite Complex / Infinite Water Inc. thanks you
