COP-OUT 29

Infinite Water Inc., as many others this week, will be watching as delegates of **COP 29**, from around the world focus on taking urgent and ambitious action to tackle the climate crisis. Of particular concern for **Infinite Water Inc.** are water-related issues being an important part of the outcome of the **COP 29 Declaration**. This will inevitably call for integrated approaches when combatting the causes and impacts of climate change on water basins and water-related ecosystems. Unfortunately, like many of the **UN** resolutions it is weak, ineffective and falls much too short in recognizing a life and death narrative.

Infinite Water Inc. believes that water is a singular concern deserving more than brief prepared by an UN-Water Expert Group on behalf of **UN Water**. The issue of water must be placed in a realm separate from the over simplified 'climate change' narrative. **Infinite Water Inc** believes that there are still many deniers, and those with various alternative views, on the state of natural occurrences which have wandered way beyond the historical norms.

Infinite Water Inc understands the day-to-day impact that water has on all living creatures as well as the environment. **Infinite Water Inc.** has a mission to create more education and more available understanding of how serious the world water situation is, and what is being done about it through independent sources. **Infinite Water Inc.** will not rely on, nor will **Infinite Water Inc.** wait for, the sluggishness of the UN and its lip service agencies to resolve the monumental risk water is currently facing.
